Quiz Instructions

Your task for the project is to predict which **painting** a survey respondent is describing, given answers to some questions about the person's perception of that painting.

In the Data Collection phase, you will answer several questions about some famous paintings. Keep in mind that the questions are supposed to be subjective, open-ended, and hopefully fun! This way, the machine learning algorithms you develop will be able to predict which painting a set of responses is describing, but not too easily.

Make sure that:

1. you complete the questions for each painting (you will see each question 3 times total).
2. put some thought into your answers. Remember, these responses will be part of the data you and your classmates use in the final project.
3. you do not use the names of the paintings or artists in your answers.

We will pool together your answers and share them with you, so that you can use the data to train your model.
